

How to Find Accelerated Reader (AR) Tests By Title, Author, or Subject on Destiny

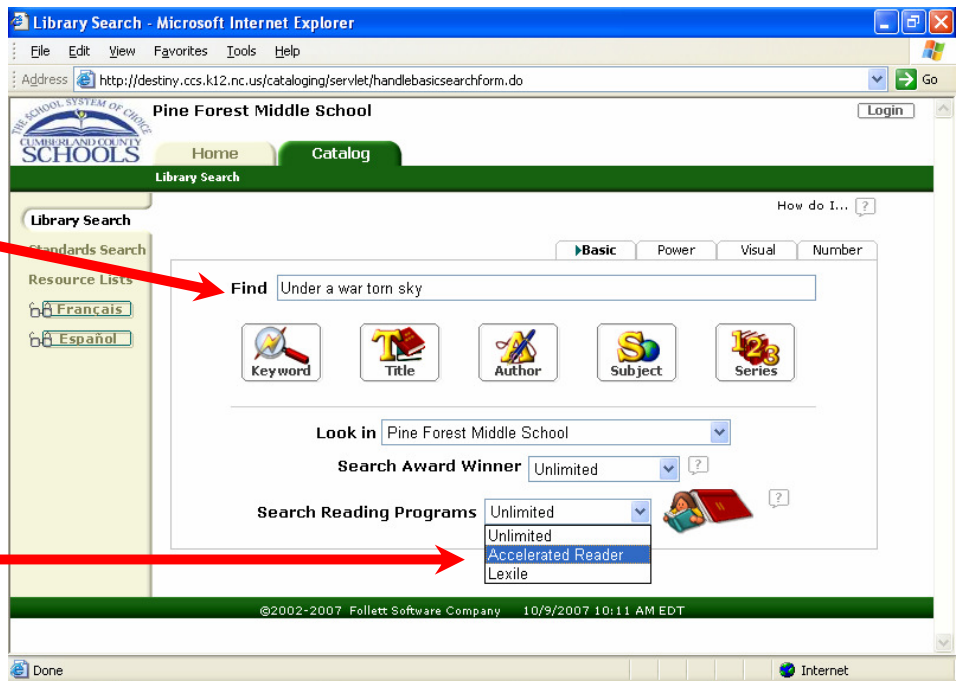

Click the **Catalog** tab at the top of the page

Type the **Title, Author or Subject** of the book you are searching for on the "Find" line.

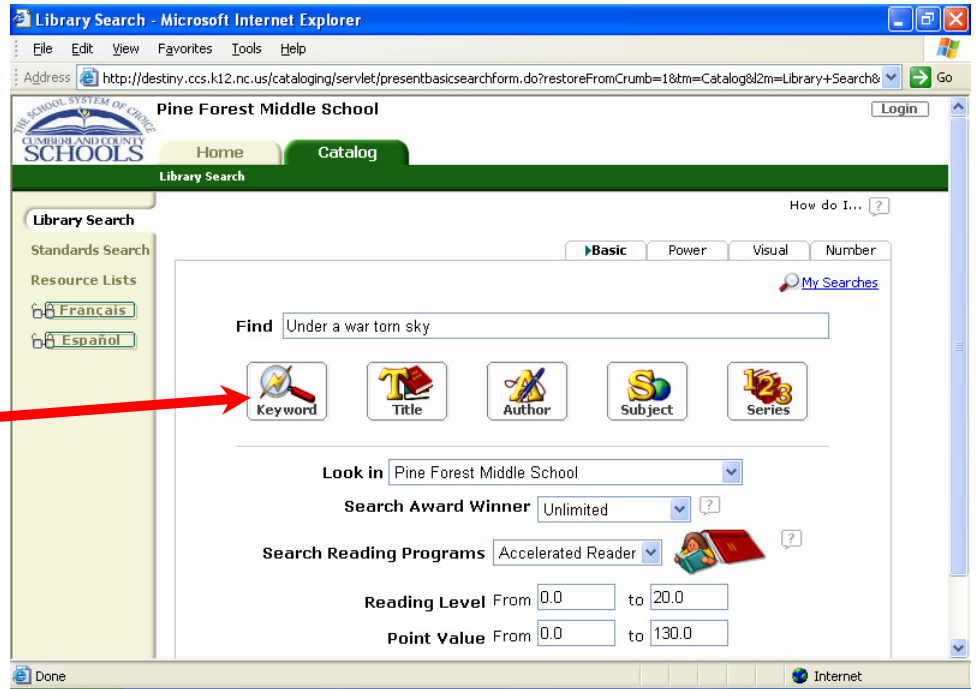

In this example we are searching for the title "Under a War Torn Sky."

Choose **Accelerated Reader** from the "Search Reading Programs" drop down

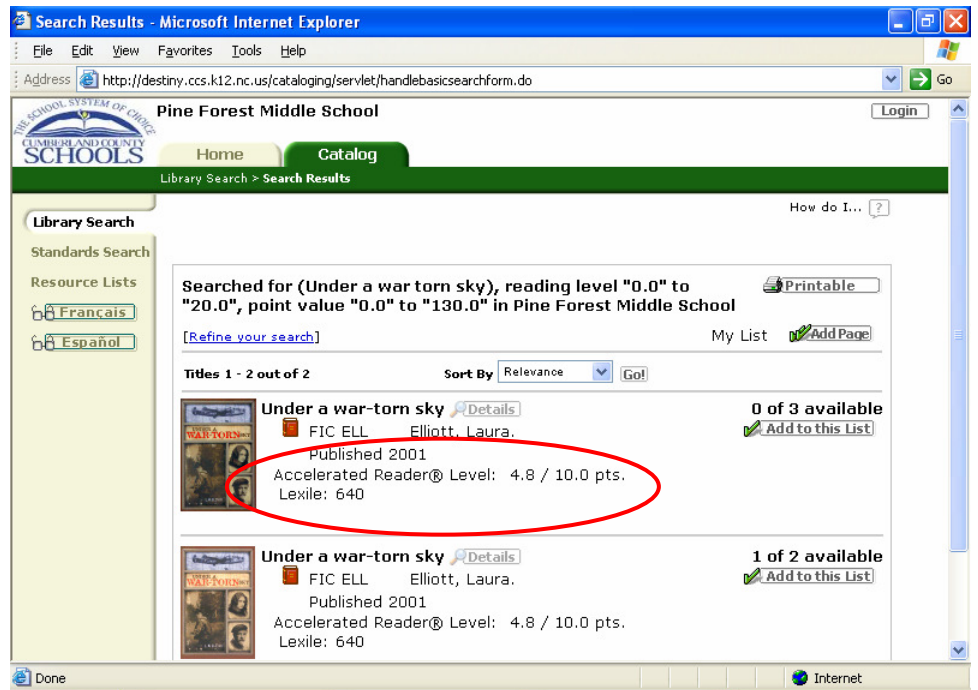

The screen will change to show reading level and point value.

Click **Keyword** or hit **Enter** for the broadest search. You may click **Title, Author or Subject** for a narrow search.

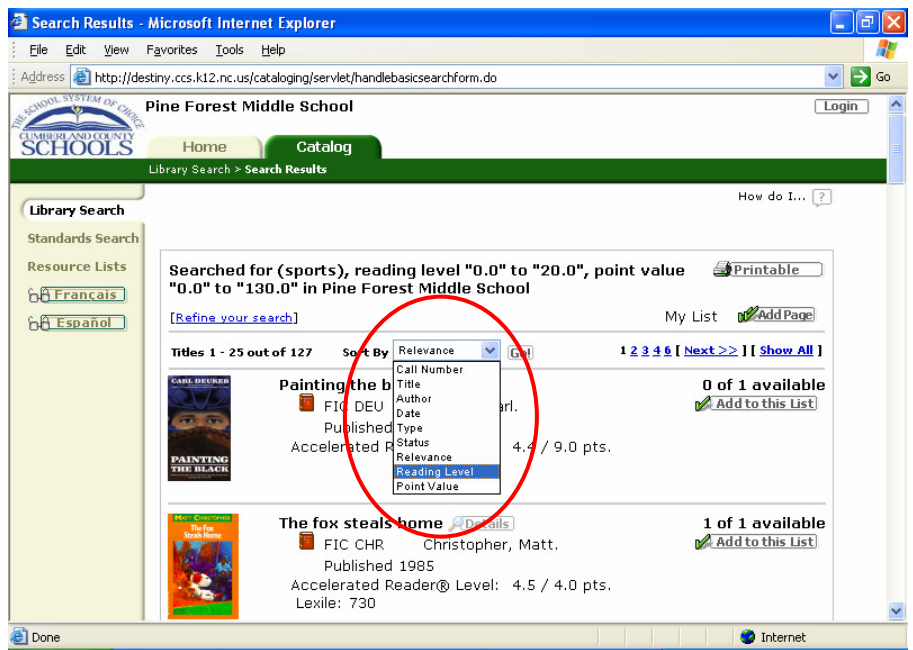

Your search results will show the AR information if there is a test.

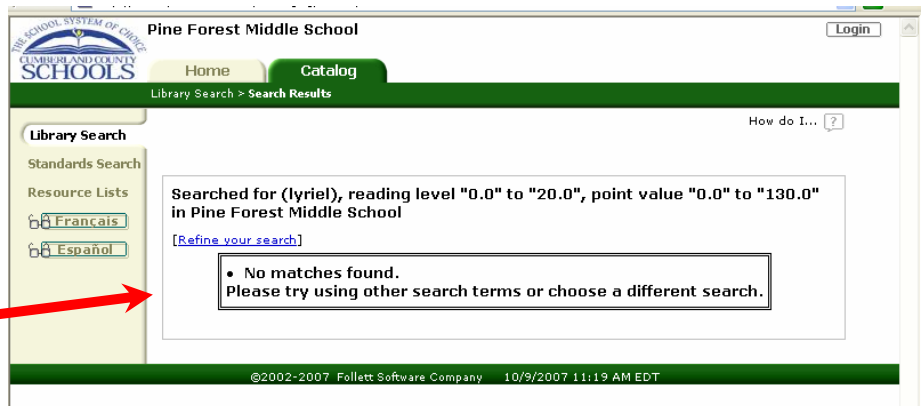

Notice that the "Sort by" drop box in Destiny allows you to sort the results in your list by:

- Call Number
- Title
- Author
- Date
- Type
- Status (*Availability*)
- Relevance
- Reading Level or
- Point Value

If there is no test available, this is the screen you will see. Tell your librarian so the test can be added to the next AR order.

Note: Although they may seem the same, Destiny and AR are two completely different programs. **The list in the AR program has the most accurate and up-to-date information but can only be accessed from a school computer.** Destiny, on the other hand, can be accessed from home and school through the Internet. If you see AR information in Destiny, and then go to take the test in AR, but it is not there, please tell your librarian so it can be fixed.
